Welcome to the Future of Trading
MODULE 1: INTRO TO TRADING

24/7 Unlimited Viewing Access
12 hour training with breaks midterm (each module 4 hours approx.)
Q&A at the end
Bonus Material (I always throw you a bone on a crypto coin or 2 I am watching)

MAIN THEME: The Psychology of Trading

Contrarian Thinking: Observe the masses and do the opposite 51:55
"Buying Fear and Selling Greed" 54:00
Support and Resistance 1:05:10
The pattern of "Threes and Fives" The Elliott Wave Theory 1:06:05
Applying Support and Resistance – "Bouncing Ball" 1:08:15
Bullish and Bearish Trends 1:21:50
Analyzing Volume – the "number-one" Indicator 1:34:40 to 1:45:49
Stochastic and RSI (Relative Strength Index) 1:37:35
(Note: mentioned but not taught)
FOMO – Fear of Missing Out 2:05:15
Intro to Trend Lines 2:06:50 to 2:18:45
How Emotion Moves the Market 2:29:00 to 3:28:00
(How to get in and out of trades – Including coin trade calls)
The Market Cycle Comparison 3:13:12
Market Structure Explained 3:33:25 to 3:45:50

Q&A 4:00:45
Q1: Double of Litecoin in December – along with volatility
Q2: Discussion about Populous Token 4:02:52
Q3: Advice on developing charting skills 4:04:20
Q4: Recommendations on learning material 2:06:13
Q5: Tradecall Service explained 4:07:00
Q6: Taking profit back into USD on CoinBase 4:07:50
Q7: Stop-Limit discussion and stacking buy-ins (averaging) and OMG 4:09:35
Q8: Trader Boss' buying service explained 4:12:20
Q9: Coinbase Referral Link discussed 4:13:40
Q10: Timeframe for PPT 4:14:50
Q11: Wallets for holding PPT – or ERC20 tokens (Nano, Trezor, etc.) 4:15:30
Q12: Wiring funds into exchanges 4:17;10
Q13: One-on-One Sessions with TraderBoss 4:18:47
Q14: Tradecall Service offer explained 4:19:33
Q15: Beginner courses (two videos) 4:22:10
Q16: Stop-Limits on GDAX exchange 4:23:00

Q17: The U.S. exchanges 4:24:00
Q18: Spectre ICO 4:25:10
Q19: Hardware wallet discussion 4:29:04
Q20: Bittrex exchange discussion – verification process (AML-KYC) 4:29:55
Q21: EOS targets and strategy 4:32:35
Q22: Explanation of trade call service structure 4:37:00
Q23: Advice for people who are involved in "Bit-By-Bit" 4:40:35
Q24: Appearing in Sedona, Arizona on January 15th, 2018 4:41:00
Q25: Setting up on all the exchanges 4:41:55
Q26: Module 2 first topic: Candlestick Charting and Chart Patterns 4:42:50
Q27: Core Group versus Trade Call Group and the need to have Bitcoin 4:45:32
Q28: Initial Investment requirement for Trade Calls and enrollment date 4:46:40
Q29: A coin TraderBoss is buying currently – BlockTix (TIX) 4:48:10
Q30: A repeated review of the various exchanges 4:52:15
Q31: Opening an exchange account with a trust or corporation 4:54:11
Q31: Ethereum call for December-January 4:54:28
Q32: The safest way to store passwords 4:55:28

video 2

MAIN THEME: Cashflow and Income

Review of the Litecoin chart (HODL) 05:55
Percentages of holdings hat are held in cryptos 16:35 to 24:45
Stuck/frozen screen issue fixed 40:00
Creating cashflow and common beginner analysis mistakes 40:15 to 44:30
Strategizing your trading plan and trading your plan 48:40
NEM overview (jab in ribs) 159% trade 57:20
NEM trend line analysis; relation to BTC price, and the fan lines 39:10 to 1:04:18
Trend lines continued on EOS chart; layering positions (top 5 coin) 1:04:19 to 1:11:35
Litecoin chart: Layering versus HODLing, profit-taking 1:11:35
Income versus Cashflow – Bitcoin chart example and entering "S" curve 1:28:30
Populous analysis – #1 coin for 2018 (income vs. cashflow continued) 1:46:00
EOS analysis and volume changes 1:59:20
Back from middle of class break 2:32:00
QTUM analysis 2:32:00
No "double bottoms" and no "double tops" (in QTUM analysis) 2:43:00
Total Market Cap/ Volume analysis 2:50:00
Return to QTUM as example for volume recognition and taking profits 2:55:25
Call for doubling of Litecoin in December 2017 2:59:20
Call for EOS doubling by February 2018 2:59:47
Analysis of the upcoming QTUM fan lines/points 3:00:15
Continuation of trend analysis/cashflow strategy using STRATIS 3:02:35

Trading versus gambling 3:18:10
Slowing down – Swing versus day trading, loss prevention 3:19:00
The Market Cycle chart breakdown and chart application 3:22:04 to 3:58:30
Beginning stages of money management – coin/token circulating supply 4:03:45 to 4:35:20
• LTC
• PPL
Q&A 4:33:50

Q1: The Elliott Wave analysis question asked (not taught in-depth yet) 4:35:28
(see Elliott Wave tutorial in YouTube link below)
Q2: Should you borrow fiat or from other sources to trade crypto? 4:36:22
Q3: Choosing chart time scales 4:38:19
Q4: Book recommendation "Laws of Success" by Napoleon Hill 4:38:39
Q5: Why use LTC/USD chart rather than LTC/BTC chart? 4:39:52
Q6: When to get out of a coin and at what percentage" 4:42:40
IOTA example:
• Impulse move
• Retracement
• 3rd Wave
• New High

Q7: Is PPT entering S curve? 4:47:55
PPT example:
• Innovator Stage
• Early Adopter Stage
• Future trend

Q8: Should I (inaudible) futures? 4:52:08
Q9: What exchanges does TraderBoss use? 4:54:00
Q10: How do you determine the exit on QTUM for a day trade? 4:54:35
Q11: Continuation of QTUM question regarding percentage to leave in 4:55:00
Q12: What coins do you use to hold profits? 4:58:50
Q13: Putting (fiat) money into cryptos 5:00:25
Q14: Where/how can you move money quickly into cryptos? 5:01:39
Q15: Why are we charting alt tokens against BTC and not USD? 5:02:58
(Does not recommend using Tether)

Q16: When looking at chart, what timeline do you use (answer: daily) 3:04:23
Q17: What is a good time to trade LTC to BTC? 5:06:16
Q18: How would you compare manipulated markets to BTC market? 5:07:00
Q19: What charting system(s) do you use? 5:09:40
Q20: Inaudible question about day trading 5:10:19
Q21: Can you explain "swing trading?" 5:11:3

Video 3

MAIN THEME: Risk Management/Mitigation

Review of previous plays using QTUM chart 05:10
Overview of topics in this module and into January: 07:45
• Risk Management
• Fibonacci
• Ichimoku Cloud
• Trendlines
• Moving Average Crossover
• Golden Crosses
• Candlesticks
• Chart Patterns
Bitcoin chart analysis and projection 10:00 to 18:30
Shorting Bitcoin 10:50
EOS chart analysis and projection 18:30
• Expanding Channel
• Retest of resistance
• $20's target in January
• Profit Taking
• "Free-rolling" to maximize a trade
Litecoin chart analysis and projection 20:20
• Low-volume pullbacks
• Buywalls
• TraderBoss likely not selling LTC for a year
• $525-$600 LTC by end December
• Important LTC announcements in January
• Second chance at ETH through EOS in January

QTUM chart analysis and projection 23:12
• Airdrop of Bitcoin Ultimate for QTUM holders
• Breakout from falling wedge
• Three "marching soldiers" in volume candles
• Volume candle size to price comparison
Ethereum chart analysis and projection 26:26
• 7000% move
• $2000 potential very soon
• A bullish retracement
• $20,000 potential in 2018 projection explained
• Elliott Wave – impulse moves

• Wave Three Rule (cannot be shortest wave)

OmiseGo chart analysis and projection 36:00
• Trendline
• Identifying the impulse move
• ABC correction
• Resistance trendline becomes support
• New market cycle projection

Risk Management Defined – Main Topic for Module 42:50
Winning trade percentage calculations 46:20
Bitcoin Cash chart analysis 51:18
• Identifying impulse move
• End of a market cycle at around 88% retracement
• Volume trend
• Market cap analysis
• Generating "free" Bitcoin

Generating Bitcoin from trading Ethereum 1:05:00
Audio Issues / frozen screen begin in BTC analysis 1:06:15 to 1:09:40
Stratis chart analysis 1:09:05
1500 to 2000% gain target in 2016 using only HODL 1:11:40
Return from locked screen but severe audio issues remain 1:12:53 to 1:15:25
Small cap vs. large cap 1:16:00
Trading Equation: Market cap divided by coin count, plus the project 1:16:50
Money is made on ENTRY rather than exit 1:18:45
Timing a trade entry: Bitcoin Cash chart example 1:20:51
Entry Cont'd: Timing the wick on BCH Support line 1:25:40
Entry Cont'd: Analyzing the market cycle 1:28:15
EOS entry strategy 1:28:40
Entry: Look for shrinking candle size relative to stable volume 1:29:50
Entry point determines risk reward – taking a paper loss 1:31:05
Entry Continued: OMG, riding out a market cycle 1:33:45
OMG – analyzing possible end of market cycle 1:36;47
OMG – Analyzing trendlines to call next moonshot 1:37:27 to 1:38:45
Not holding large percentage of portfolio in alt-coins 1:39:03
Identifying the high-cap coins for holding portfolio majority 1:39:53
The bulk of CryptoBoss Jay's portfolio revealed (each over $1b mkt. cap.) 1:41:00
Bitcoin
Ethereum
Litecoin
Bitcoin Gold (not bought but gained by fork)
NEM

EOS
Stellar
Qtum
NEO (building a position)
Populous
OmiseGO (building a position

Minor positions being built:
Stratis
Veritaseum (one to seriously watch)
ZCash

Strategizing the alt-coin minority share of your portfolio 1:47:00 to 1:54:05

Begin Break/End Break 1:54:10 / 2:17:43
How to set and use Stop Loss in Bittrex Exchange (YouTube Video) 2:18:00
Stop Loss explanation (in OMG chart) 2:21:25 to 2:24:45
Stop Loss explanation (in Bitcoin Cash chart) 2:24:45 to 2:29:48
Switch back to OMG chart – Shorting and risk management 2:29:48
Risk Management using Ada chart – Do NOT chase entry! 2:31:56 to 2:35:20
Testing of support levels in Bitcoin rise 2:35:20
Analyzing similar patterns in Litecoin chart – "The Cup and Handle" 2:42:05 to 2:50:55
Entry determination continued – QTUM chart example (reversing trend) 2:51:10
Entry continued – Ripple chart example: the pullback window 2:59:00
Entry continued = OMG chart example – risk analysis at entry point 3:09:55
"Free-Rolling" coins – IMPORTANT! 3:31:43 to 3:43:00

Q&A
Q1: Which chart do you like best; the log chart or the linear chart? 3:43:39
Q2: Any information on reading volumes and stochastics? 3:45:25
Q3: Elliott Wave Theory instruction? 3:46:30
Q4: How do you know when you're close enough to top to sell 75% 3:48:50
Q5: Do you ever use margin with cryptos" 3:49:12
Q6; Why won't certain exchanges allow withdrawal of certain tokens? 3:50:35
(This includes great strategy for avoiding exchange shutdowns when market is hot)
Q7: When/why do you look at Coin/BTC vs. Coin/USD charts? 3:51:58
Q8: How to judge a "pig from a bull?" 3:53:35
Q9: Tradecall Service Questions 3:58:40
Q10: Can you show the volume screen? 4:00:00
Q11: Ledger Nano connecting to websites 4:00:32
Q12: Litecoin and the "S" curve 4:02:41
Q13: How to set a trendline – on candles or on wicks? 4:03:48
Q14: Jay's foundation closed to new people 4:04:50

Q15: What wave is Litecoin currently in? 4:05:47
Q16: What is Jay's morning routine? 4:06:37
Q17: Do you use software for tracking your trades? 4:08:12
Q18: Use of Fibonacci? 4:08:50
Q19: Can you download Jay's videos? 4:10;43
Q20: Strategy if you have $100K in crypto? 4:11:27
Q21: Explanation of EOS projections 4:13:12
Q22: Another upcoming tradecall service question 4:14:30
Q23: EOS token registration 4:16:18
Q24: Portfolio strategy if you only have $5000? 4:17:35
Q25: Is mass adoption coming in 2020? 4:18:56
Q26: When we reach mass adoption will profitability fall? 4:23:22
Q27: What will happen to cryptos if stocks crash? 4:24:37
Q28: If you only had $800 in cryptos, which would you recommend? 4:27:40
Q29: What is Bloclfolio? 4:30:12
Q30: Why is IOTA one of your top coins? 4:30:25
Q31: Can a Nano Ledger be hacked? 4:36:00
Q32: Are there coins not subject to the market cycle chart? 4:37:15
Q33: Using daily and weekly market charts 4:38:02
Q34: North Korea vs. USA – What happens to cryptos? 4:38:39
Q35: Can you explain "trading in threes and fives?" 4:40:22
Q36: I was an idiot and bought OMG when it pumped 4:41:09
Q37: Impulse waves five-up and three-down? 4:42:22
Q38: General advice 4:42:45
Q39: Good time to buy PPT or wait for pullback? 4:44:27
Q40: John McAfee's Bitcoin prediction for 2020 4:47:20
Q41: Would you story your coins on Exodus? 4:48:43
